SUMMARY

Software Engineer specializing in automation, scalable application design, and reliability-focused development. Experienced building ASP.NET Core, UWP, and WPF applications and designing automated testing frameworks that improve system stability and developer velocity. Strong collaborator who works closely with cross-functional engineering teams to deliver maintainable, high-performance software.

SKILLS

Programming:	C#, Python, C++, JavaScript, HTML, CSS
Frameworks & Tech:	ASP.NET Core, WPF, MSTest, WinAppDriver, Appium, REST APIs, Entity Framework
Tools:	GitHub, Azure DevOps, Jira, Confluence, TestRails, Visual Studio, Postman
Testing:	Automated Testing, Integration Testing, Regression Testing, API Testing, CI/CD
Other:	Unity, Godot, System Analysis, IT Troubleshooting, Creative Problem Solving

WORK EXPERIENCE

365 Labs – Baton Rouge, LA

Software Engineer • March 2023 – Present

- Developed and maintained C#.NET applications including ASP.NET Core APIs and UWP/WPF client applications.
- Built automation and integration testing frameworks using MSTest, WinAppDriver, and Appium to improve reliability across distributed systems.
- Engineered automated test suites that detect high-severity defects early, reducing regression cycles and improving release stability.
- Implemented and validated API integrations while collaborating closely with backend developers on system design and debugging.
- Coordinated release validation and testing workflows across engineering teams to support stable deployments.

Electronic Arts (EA) – Baton Rouge, LA

Defect Coordinator • January 2022 – January 2023

- Audited, reproduced, and prioritized issues for rapid assignment to development teams.
- Collaborated with Respawn developers to establish stronger error-handling practices.
- Trained and onboarded UK testers, providing Jira training and workflow guidance.

- Created training documentation to improve onboarding for future defect coordinators.

Quality Assurance Tester • October 2020 – October 2021

- Worked with distributed teams across the U.S., U.K., and Romania to execute comprehensive gameplay and systems testing.
- Investigated complex gameplay issues involving ability interactions and system-level mechanics.
- Selected for the MRVN team to analyze high-impact gameplay issues.
- Documented and communicated defects clearly between testing and engineering teams.

EDUCATION

B.S. in Computer Science — Louisiana State University, Baton Rouge, LA

August 2021 – December 2025

SELECTED PROJECTS

DEMS Downloader (UWP Application)

- Built upload/download workflows, date-filtered search, and Fluent UI interface for law enforcement evidence handling.
- Implemented API integrations and queue-based video management features.

Automated Testing Framework for UWP Applications

- Developed MSTest + WinAppDriver + Appium automation that converts natural-language test cases into executable sequences.
- Reduced manual QA effort and improved repeatability of UI regression testing.
